# YAMOA™ POWDER

**Yamoa™ Powder** has been traditionally used to aid recovery from respiratory and allergic conditions. **Yamoa™ Powder** is a herbal remedy that originates from West Africa, and has been handed down throughout the generations. **Yamoa™ Powder** is a totally natural substance made from the ground bark of a unique gum tree found in West Africa, it contains no other additives.

## Instructions For Use

### Yamoa™ Powder 30gm

- **Mix** the entire contents of the 30gm bottle thoroughly with an average size jar of honey, about 1lb (454gm).
- Stir well until the powder is completely mixed, also stir the mixture each time you use it.
- Adults: One 5 ml spoonful of mixture twice a day for one month continuously.
- Children: under the age of 12: Half a 5ml teaspoon of mixture twice a day until finished.
- **Or** take a ¼ of a 5ml spoon of neat powder twice a day with a glass of water or fruit juice, tea or any beverage.

### Yamoa™ Powder Capsules

These vegetarian capsules are filled with pure Yamoa Powder, and are convenient approach to taking the original powder. These capsules can be as effective as the powder, and can be taken by diabetics who have been unable to take Yamoa mixed with honey or other sweeteners to mask the taste, and by busy people on the move.

Yamoa Powder Capsules come in containers of 60 or 120 capsules, lasting 30 or 60 days for adults, 60 or 120 days for children under 12. No need to mix with honey or other sweeteners or beverages, other than for children (see below).

#### **Dosage:**

**ADULTS:** 1 capsule twice a day (morning and evening) with water.

**CHILDREN aged 12 and under:** ½ capsule twice a day (morning and evening) mixed in honey or jam, maple syrup or other foodstuff to mask bitter taste. If the child is old enough to swallow the capsule, only half of the powder will require mixing with honey (or other).

### Yamoa™ for Children

*The use of honey or jam is not recommended for very young children under 1 year old because of the high level of refined sugar and the risk of Botulism (bacteria in honey). A sugar-free/artificial sweetener-free jam (jelly) such as St. Dalfour is suitable. This is available in most large supermarkets. The same quantity of jam for the mixture – 454g – is required. This can then be mixed into the baby's cereal or yoghurt. It is also safe to take neat. The dosage for under 12 year olds is **half a teaspoon of mixture twice a day**.*

*Yamoa™ Powder should **not** be taken during **pregnancy** or whilst **breastfeeding**, without your doctor's or paediatrician's consent.*

**FOR BEST RESULTS: FINISH ENTIRE MONTHS SUPPLY EVEN IF RELIEF IS FOUND AT AN EARLY STAGE OF TREATMENT. TWO MONTHS SUPPLY MAY BE REQUIRED AS AN INITIAL COURSE FOR MORE SEVERE/LONGSTANDING CASES.**

**PLEASE WRITE TO US WITH YOUR COMMENTS, AFTER TREATMENT.**

**IT IS IMPORTANT NOT TO STOP YOUR, OR YOUR CHILD'S, CURRENT MEDICATION WITHOUT YOUR DOCTOR'S ADVICE.**

**It is our hope that many more people will eventually feel the benefits of Yamoa Powder through your having taken it before them. So, if after taking Yamoa, you are as pleased as most people with the result, please do a friend, relative or even a stranger a favour and pass this information on to them. You could truly help to change some lives.**

**Disclaimer:** We do not, and will not, claim that Yamoa Powder is a cure. Where this word is mentioned in connection with Yamoa, it is as a direct quote from a former user or critic of Yamoa Powder, and reflects only their own true experience. Everybody is different and everybody will react differently and have a unique experience with Yamoa Powder. We cannot offer any guarantees that Yamoa Powder will work for you, we can only express our own and our customers' experiences of it.
